DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ayyagari et al. (U.S. Patent No. 6,018,659).

Regarding claims 1-4, Ayyagari discloses a wireless communication system in which radio links are established between a base station, which is an OCC or Operations Control Center (Fig. 1/item 105), with mobile stations such as AV or airborne vehicles 106 (Fig. 1), wherein when

Serial Number: 09/525,901

Art Unit: 2684

communication is performing, a signal beam pointing substantially toward only one mobile station, i.e., the OCC can either establish point-to-point (or spot beams or staring beams) or hopping beams to AV units or mobile stations (col. 5/lines 2-51), the base station forming a broadcast signal, which is then identical information being simultaneously broadcasting to a plurality of mobile destination units; or in other words, a multicast is broadcasting from the calling unit to other mobile units is performed (col. 17/lines 1-28); and the calculating technique for calculating the coefficients for adjusting the amplitude and phase of antenna elements in forming the broadcast signal beam is taught by Ayyagari (col. 6/line 26 to col. 7/line 23) wherein the antenna is an adaptive array antenna, i.e., which is being called a PAA or phase array antenna (col. 7/line 24 to col. 8/line 8).

Page 3

As for claims 5-7 and 8-10, these claims for a base station for establishing radio links with mobile stations and a corresponding method for establishing radio links, respectively, as mentioned earlier are rejected for the reasons given in the scope of claims 1-4 as discussed in details above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Jain et al (US Patent 6,085,101), Harel et al (US Patent 6,128,472), Fasulo, II et al (US Patent 5,742,639) & Myers, Jr. (US Patent 6,023,625) disclose communication systems with multicast capability between base station and mobile stations.

Art Unit: 2684

4. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Thuan Nguyen whose telephone number is (703) 308-5860. The examiner can normally be reached on Monday-Friday from 9:00 AM to 6:00 PM, with alternate Fridays off.

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Hunter, can be reached at (703) 308-6732.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Technology Center 2600 Customer Service Office** whose telephone number is **(703) 306-0377**.
